

I have greatly appreciated the reduced phone solicitations that my family now received as a result of the State of Indiana's "no call list." I am absolutely opposed to any corporation or institution's efforts to make any exception. This includes those that I currently do business with. I wish to maintain the right to contact them of my own free will when I desire to contact them, not when they want to solicit further business with me. That IS my right to privacy. Thank you for your consideration in this matter.
